Subject: Deckgard and Gripgard discontinuation

Dear Valued Customer,

Please be advised that BP Canada is discontinuing two underlayment products: **Deckgard** synthetic underlayment and **Gripgard** self-adhered membrane.

Deckgard is no longer available, effective immediately. Gripgard remains available while current inventory lasts; no further production is planned, and we encourage you to plan your orders accordingly.

The **BP Canada Weather-Tite® system warranty remains fully applicable**, as usual, for roofing systems installed using either product. This change does not affect existing warranty coverage.

For projects going forward, we recommend using the following CertainTeed products, both proven performers within the Saint-Gobain family of brands:

- **CertainTeed DiamondDeck®** - in place of Deckgard
- **CertainTeed WinterGuard® Granular** - in place of Gripgard

As BP Canada and CertainTeed products are now interchangeable across our roofing systems, **these substitutes are fully eligible under the BP Canada Weather-Tite® warranty**, just as BP Canada underlayments are accepted under CertainTeed's SureStart™ coverage. The transition involves no loss of warranty coverage. Please note that pricing on these products differs.

If you have any questions, or to confirm remaining Gripgard availability, please contact BP Canada Customer Service or your local BP Canada Territory Manager. We appreciate your continued support of BP Roofing Products.

Best Regards,

Raphael Renault
